

Strategy, Reporting and Self-Review

The Paraparaumu School board, with the principal and teaching staff, will develop a three year strategic plan supported by annual targets and objectives to progress the board's strategic goals. The strategic plan will be based on National Education and Learning Priorities (NELPs) and legislated requirements of state school boards.

The strategic plan, annual targets and objectives will be the board's major policy statement and guiding school document. The strategic and annual plans will be made available to the Ministry of Education each year by the required date.

The Paraparaumu School Board delegates to the principal the requirement to report to students and their parents on the progress and achievement of individual students:

1. based on accurate and quality assessment information
2. in plain language and in writing, at least twice a year
3. across the National Curriculum expressed in the NZC or Te Marautanga o Aotearoa, including in literacy and numeracy and/or te reo matatini and pāngarau.
4. reports to the school community, without identifying individual students, on the progress and achievement of students as a whole, and in groups, on the basis of good quality assessment information, including the achievement of Māori students in relation to the plans and targets developed in consultation with the school's Māori community.

The Paraparaumu School board, through the principal, will maintain a comprehensive programme of self-review, and ongoing cyclical internal evaluation and inquiry, including plans and programmes; the evaluation of student progress and achievement information, based on accurate and quality assessment information; the implementation of audits and reports; a triennial review of policies and procedures and any special reviews triggered by emerging issues and unforeseen events.

The Paraparaumu School board will receive from the principal an analysis of variance (AOV) between the school's performance and specific aims, objectives, directions, priorities and targets set out in the school's strategic plan. The AOV will be provided to the Ministry of Education by the required date with an updated school strategic plan each year.

The Paraparaumu School board will annually conduct a review of board performance, which considers the annual report, ERO report, board roles and responsibilities, and any relevant matters.
